

## KERALA STATE INSTITUTE OF DESIGN INVITES TECHNICAL SUPPORT FOR COLLABORATING ON PROJECTS

In order to fulfil the mandate for which it has been set up, Kerala state Institute of Design is in the process of undertaking various projects for several state departments and agencies. As a consultant in the field of Design, KSID gives Design support, Design guidance and takes up projects to be executed by the institute.

KSID requires technical support of various kinds for executing such Design projects. There is a genuine need to identify, short list, categorise and create a pool of technically capable persons who can associate with and support KSID on various design projects.

KSID primarily requires expertise in various technical aspects related to Design. The ranges of design fields which KSID plan to reach out are varied and broad. Hence the expertise we are looking for is not limited to any domain. We are looking for all types of willing partners. They should be willing to spare time to work on KSID projects.

The expertise we are looking for is primarily technical. It can range from expertise in drawing, storyboarding, design software to expertise in space design, service design, system design, branding, assistance in video production, cinematography, photography, editing, audio recording, content writing, script writing, advertisement film production, graphic design, package design, logo creation etc. There is no limitation to apply and all types of creative and technically qualified persons who think they can contribute to Design are invited to apply.

Please note that this is not any kind of job offer. The objective is primarily to create a data base of skilled and trained personnel whose service can be utilised in the projects of KSID as and when the need arise. The only opportunity that will be given to these professionals will be an opportunity to collaborate with KSID as and when the need arise.

There is a sample format of application form and skill sheet which can be customised and used.
