

Blouse & Skirt (Pattern making)

The clothes you wear are highly influenced by the seasons, may the be fall-winter or spring-summer. For every season, the designs and trends are in constant change, as well as the predominant colors. I have made this garment with the theme of spring harvesting.

Khadi dress (Draping)

Khadi fabric is a handwoven natural fiber made with cotton. Nowadays high prices and a bad attitude are pushing khadi Fabric beyond reach. Commonly Kadhi designs are according to the Indian concept. If we improve the design to a contemporary style and distribute it worldwide the production of kadhi can be improved. So I have designed my draping garment according to a contemporary style.

Art Plate (Machine Embroidery)

Concept: Imperfectly Perfect

Theme: Stay black & stay beautiful

Society has discrimination towards the dark. So I have selected this theme to make people understand the dark skin is also having a beauty of its own.

Emin Mariya Sajan

Integrated Textile and Apparel Design
Batch 5 2019-2021

Designing means conveying my idea to the public. Inspired by strange and rare concepts, I try to propagate something noble to the society where I use the effective language of design. As a textile and apparel designer, it may be possible by constructing a garment, by designing a product or by a small decorative work, or even by finding out a solution to a problem..
