

# CerviScan

A cervical cancer screening  
Workstation on Wheels

Client: Sascan Meditech  
Guide: Unni Mohan

CerviScan is a scanner workstation on wheels for the screening of cervical cancer. The CerviScan is designed by considering the physiological as well as psychological needs of both doctors and patients.

CerviScan is designed to improve the entire scanning experience of the patients as well as to improve the usability and functionality of the doctors.

## **Nikhil Vishnu K** Integrated Lifestyle Product Design

I'm fueled by my passion to understand how things are the way they are and how they can be improved. I consider myself a forever student eager to build on my academic foundation in design and to stay in tune with the current innovation in the field of design. I would like to explore in the field of Healthcare Innovation.
