

Revol

Mid century modern
revolving Bar stool

Revol - Bar stool

A prototyping exploration in Jackfruit wood and Steel using each of their strength to advantage

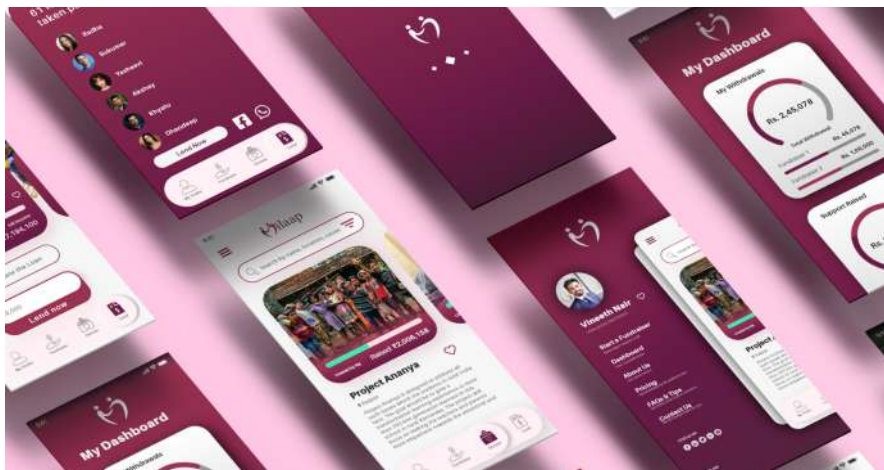

Vineeth Nair

Integrated Lifestyle Product Design

Batch 2019-2021

I am passionate about learning and exploring new things from different domains and applying them to what I do. As a Product designer I feel that it is my responsibility to design and create functional and aesthetic products of value which are sustainable. Taking lessons from my MBA to be a well rounded individual, I give equal importance to designing the visual communication for the product/system as it is imperative that it communicates itself to the user.

Milaap App UX & UI

Designed an app for Milaap by first doing a UX case study on their existing website using the interaction design principles.
